Dir. Michelle Heighway, 2022, UK, 70 min

An existential journey through the power of healing with the enigmatic Damo Suzuki, former lead singer of krautrock legends CAN. Critically acclaimed director Michelle Heighway has been working with the mercurial Japanese-born musician since 2014, culminating in the fascinating insights of ENERGY. The film follows Suzuki over five years of his life in Germany and the UK as he confronts cancer and attempts to continue a never-ending global tour.

Event supported by the BFI, awarding funds from the National Lottery.
